

## **INSTRUCTIONS**

**The visible artwork area will be 2000 x 850mm.**

**The artwork needs 3mm bleed plus an additional 100mm at the bottom of the banner. This area feeds into the banner stand but we require the background colour/photo to extend into this area to ensure no white is visible when the banner is assembled.**

**Please keep all text and logos within the safe zone margin.**

**Please turn off the Safe Zone layer before exporting.**

**Please export the artwork as a PDF with trim marks, bleed and slug area all turned on.**
