INSTRUCTIONS

The visible artwork area will be 2000 x 1000mm.

The artwork needs 3mm bleed plus an additional 100mm at the bottom of the banner. This area feeds into the banner stand but we require the background colour/photo to extend into this area to ensure no white is visble when the banner is assembled.

Please keep all text and logos within the safe zone margin.

Please turn off the Safe Zone layer before exporting.

Please export the artwork as a PDF with trim marks, bleed and slug area all turned on.
